

## Haut-Katanga: Welcome and training Center of « BDD Lubumbashi » to be operational very soon

**Lubumbashi, April 19, 2018 (caritasdev.cd):** The Welcome and Training Center of the Diocesan Bureau of Development (BDD) Lubumbashi, a project launched in July 2014, will soon be operational. This interchange and training space built entirely of mud bricks (BTC & BTM) will host 60 people for accommodation in both single room and collective room, says Caritas-Development Lubumbashi website.

The BDD / Lubumbashi, through this construction, has the following objectives: the promotion of mud brick building techniques for sustainable management of natural resources (wood, water, land, ..); practical training of local craftsmen with certification of skills; the emergence of artisans and professional builders of mud construction as well as platforms. The other goal is to provide a shelter and housing environment for communities committed to sustainable development.

It should be noted that the appointment is set in the coming weeks for the inauguration of the CAF and the various training sessions that will be organized.
